u

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 14-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 96/01245. The reference discloses polyalkoxylated terpene derivatives, such as Formula (A) in the abstract. The degree of propoxylation, p, is 1-20, with a most preferred range of 1-3, inclusive (p. 5, line 20); the degree of ethoxylation, q, is 1-200, with a most preferred range of 1-10, inclusive (p. 6, line 1). The alkoxylated products are degreasing surfactants which do not produce foam (p. 7, lines 25+). Their utility for degreasing metallic surfaces is disclosed at p. 17, lines 18-19. As degreasing is a disclosed utility, optimization of degreasing performance is a routine expedient. Dilution with water is disclosed in the examples. Determination of the optimal concentration of a known surfactant in water is an ordinary expedient, and therefore obvious to do. This reference differs from the claimed subject matter in that it does not disclose a composition which reads on applicant's claims with sufficient specificity to constitute anticipation.

It would have been obvious at the time the invention was made to make such a composition, because this reference teaches that all of the ingredients recited by applicants are suitable for inclusion in a surfactant composition. The person of ordinary skill in the surfactant art would expect the recited compositions to have properties similar to those compositions which are exemplified, absent a showing to the contrary.

In the case where the claimed ranges overlap or lie inside ranges disclosed by the prior art, a *prima facie* case of obviousness exists. *In re Wertheim*, 541 F.2d 257, 191 USPQ 90 (CCPA 1976); *In re Woodruff*, 919 F.2d 1575, 16 USPQ2d 1934 (Fed Cir. 1990).

The data in applicant's specification have been carefully considered, but they are not sufficient to demonstrate unexpected properties. Reasons are of record in the previous office action.

Response to Arguments

3. Applicant's arguments filed April 11, 2005 have been fully considered but they are not persuasive. Applicant argues that the reference teaches that cleaning performance can be modified by manipulation of ethoxylation and propoxylation, but not degreasing performance; and that degreasing and cleaning are not synonymous. This is not persuasive because the compositions are specifically disclosed as useful cleaners for hard surfaces, and the passage at page 17, lines 18+ equates cleaning of hard surfaces and degreasing of hard surfaces. Accordingly, the person of ordinary skill in the surfactant art could reasonably infer that degreasing can be optimized by manipulation of ethoxylation and propoxylation.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
